

The figure displays a large bar chart with 12 categories of RNA ratios on the y-axis. The x-axis represents the ratio, ranging from 0.0 to 1.0. The categories and their approximate ratios are:

RNA Type	Approximate Ratio
ratio of rRNA	0.25
ratio of miRNA	0.25
ratio of piRNA	0.25
ratio of Y_RNA	0.25
ratio of srpRNA	0.25
ratio of tRNA	0.25
ratio of snRNA	0.25
ratio of snoRNA	0.25
ratio of lncRNA	0.25
ratio of mRNA	0.25
ratio of tucpRNA	0.25
ratio of other RNA	0.25

A small inset bar chart is located in the bottom right corner, showing a ratio of approximately 0.004 for the 'ratio of other RNA' category.

Below the main bar chart, there are seven empty coordinate plots, each with an x-axis ranging from 0.0 to 1.0 and a y-axis ranging from 0.0 to 1.0. These plots are likely intended for further analysis or comparison.
